SALVATION KEY CHAIN / ZIPPER PULL

ASSEMBLY INSTRUCTIONS

(Difficulty level = elementary school)

A reference sample preassembled key chain is included with orders for making 100 or more Salvation Key Chains.

- 1) Cut the cord in 13" lengths if not ordered pre-cut.
- 2) Loop the cord through the key ring or snap hook and tie a common overhand loop knot at the center of the cord.
- 3) Thread all seven beads onto the rope beginning with the gold bead and ending with the purple bead according to the color order on the message card. (If using a heart bead, make sure the heart has its pointed end down toward the glow bead so that it will not be upside down on the finished product.)
- 4) Attach laminated message card (if provided) now or attach to snap hook when finished.
- 5) Tie an overhand knot with both loose ends of the cord to hold the beads (and card) in place.
- 6) Cut ends to shorten (optional).
- 7) Place a drop of super glue onto the knots to keep them from untying (optional).

Most importantly, take time to study the Scripture Card beforehand and review with your disciples either during the assembly or afterwards.

(For a nice fragrance, lightly spray and dampen hemp with fabric refresher.)

Have fun! We would greatly appreciate your ministry testimonies and links to your ministry pictures posted in the Guestbook of our website.

Thanks! ☺
