SALVATION BRACELET ASSEMBLY INSTRUCTIONS

Raw Material = Difficult, Prepped Supplies = Medium, Craft Kits = Easy

Pictures of the 4 different ways to tie Salvation Bracelets may be found on the Salvation Bracelet Craft Kits page of our website.

Salvation Bracelet Designs a) Easiest b) Easy c) Most Difficult d) Medium

A reference sample preassembled bracelet is included with orders for making 100 or more bracelets.

➤ **From RAW MATERIALS...**

- 1) Cut the cord predetermined lengths if not ordered pre-cut (13" for children / up to 15" or 16" for adults). To determine length to cut cord, wrap cord around selected sample size wrist and add 7 inches. Since each knot will use up 1 inch of the cord, assemble one bracelet, and adjust length for remaining bracelets according to personal preferences.
- 2) Tie a basic overhand knot approximately one to one and a half inches off-center.

➤ **From PREPPED SUPPLIES or CRAFT KITS...**

- 3) If you are leading a group and everyone has received a craft kit to assemble, you should ask the participants to tighten the knot in the cord if it's loose.
- 4) Hold the cord from end to end with both hands to **determine which end has the knot tied furthest from the end of the cord.**
- 5) Starting with the gold bead, thread the first 2 beads onto the longer end of cord. The dark bead follows the gold bead if you're placing the beads according to our Message Card.
- 6) If and when placing a red heart, the pointed end is lead onto the cord first (the heart will face the wearer and not be upside down; the gold bead signifies Heaven and is worn closest to our heart). After the red bead, the next two beads placed are the glow-in-the-dark bead and the green bead.

a) Loose ends Design continued...

- 7) After the green bead, place the blue and purple beads, if used, onto the bracelet. Tie another overhand knot at the end after the last bead, causing the beads to push close together. You may now place onto the wrist and tie a knot or two to tighten. You have completed this Design.

continued on reverse

b) Ichthys Design continued...

7) After the first 5 beads have been placed, tie another overhand knot at the end after the green bead, causing the beads to push close together.

8) Stagger the two loose ends of the cord together to place the purple bead first and the blue bead last onto both ends of the cord at the same time. It is easier to place the beads over both ends of the cord when they are staggered (not lined up together).

9) After placing the purple and blue beads, tie an overhand knot as close as possible to each loose end of the cord. You may now place on the wrist and push the blue and purple beads towards the arm to tighten the bracelet. Skip to 11.

c) and d) Loop Designs continued...

7) After the green bead, place the blue, and purple beads, if used, onto the bracelet. Tie another overhand knot at the end after the last bead, causing the beads to push close together.

8) Thread one or two clear beads (depending on which design you're creating) onto one end of the loose cord. Thread the other end of the loose cord back through the other side of the clear bead(s).

9) Tie an overhand knot as close as possible to each loose end of the cord.

c) Loop Design with 2 clear beads continued...

10) You may now place on the wrist and tighten by pulling both clear beads away from each other. You have completed this Design.

d) Loop Design with 1 clear bead continued...

10) You may now place on the wrist and tighten by pulling both knotted ends away from each other.

b) Ichthys and d) Loop Designs continued...

11) Optional and Recommended: The two loose knotted ends may be tied together in a single knot or multiple knots should the owner intend to wear the bracelet continuously.

Most importantly, take time to study the Scripture Card beforehand and review with your disciples either during the bracelet assembly or afterwards.

HAVE FUN!

PLEASE encourage us and others by sharing your ministry testimonies and evangelism ideas on our Salvation Bracelets and Supplies Facebook page.

Thank you! ☺
