SALVATION KEY RING / ZIPPER PULL ASSEMBLY INSTRUCTIONS

(Difficulty level = elementary school)

A reference sample preassembled key chain is included with orders for making 100 or more Salvation Key Rings.

- 1) Cut the cord in 13" lengths if not ordered pre-cut.
- 2) **If making Craft Kits**, place the beads in the baggie first, then the cord, so that the cord won't pull the beads out while removing the cord. When passing out prepackaged Craft Kits for individual assembly, instruct your students to gently pull out the cord without spilling the beads.

or **if assembling Key Rings**, loop the cord through the key ring or snap hook and tie a common overhand loop knot at the center of the cord.
- 3) Thread all beads onto the rope beginning with the gold bead according to the color order on the message card. (If using a heart bead, make sure the heart has its pointed end down toward the glow bead so that it will not be upside down on the finished product.)
- 4) Attach laminated message card or cross now (if provided) or attach to snap hook when finished.
- 5) Tie an overhand knot with both loose ends of the cord to hold the beads (and message card or cross) in place.
- 6) Optional: Cut ends to shorten.
- 7) Optional: Place a drop of super glue onto the knots to keep them from untying.

Most importantly, take time to study the Scripture Card beforehand and review with your disciples either during the assembly or afterwards.

HAVE FUN!

PLEASE encourage us and others by sharing your ministry testimonies and evangelism ideas on our Salvation Bracelets and Supplies Facebook page.

Thank you! ☺

Shine in the Dark Commission is a Non-Profit Public Charitable Christian Ministry.
